

Array of Art Studios a rising success

Artist, Kristin Ray, has created a new spin on classic ideas. Ray, 27, is a Sarnia-born woman who has spent a lifetime dreaming of a career in the arts. She grew up in Lambton County where her creativity was cultivated and nurtured by Sarnia's beautiful waterfront and strengthening cultural appreciation which encouraged her to pursue her life's dream of owning her own art gallery. She is now the proud owner of Array Of Art Studios.

Array Of Art Studios is the first virtual art gallery in Lambton County that combines classic styles of art with the technology of our times and makes it all available for the rest of the world to see. Array Of Art Studios is ever-expanding in its mission to draw attention to the creative talent and business savvy Sarnia has to offer the rest of the world. Ray believes fully in enhancing the lives of others through colour, beauty and emotion.

This year, Ray hopes to expand the website, www.arrayofartstudios.com, and feature other local artists' work. She hopes to help others define and experience their dreams as she was helped.

"I have finally realized that understanding 'perspective' could be the summation of the rest of my life's work," says Ray. "I am able to make my mark on the world, albeit not a big mark, but enough for a tiny legacy. I cannot make other people understand how I feel but I can encourage them to feel for themselves."
